BitTON.AI

the real crypto gold

Crypto is not just Changing — It's Revolutionizing the World

The 4 Stages of BitTON.AI

Pre-seed

Seed

Foundation

Expansion

Pre-seed

1	**Designing Core Concepts for the BitTON Platform**	Developing fundamental ideas and strategies that define the architecture and future development of the BitTON system.
2	**Bi.Bot Face**	Designing and optimizing visual components that ensure ease of use and the attractiveness of the interface.
3	**Reception Desk**	Integrating secure and efficient procedures for registering new users within the system.
4	**Bi.Bot Design**	Developing user-friendly and functional screens that facilitate navigation and the use of all app features.
5	**Multilingual Support**	Integrating support for multiple languages to expand the app's accessibility on a global scale.
6	**Deposit Operation Logic**	Developing mechanisms for deposit placements and ensuring their correct processing within the system.
7	**Options Reward System**	Creating algorithms for awarding rewards for allocation options in accordance with established rules.
8	**Referral Structure**	Designing a scheme that encourages users to invite new participants and contributes to the growth of the system.
9	**Airdrop Reward Logic**	Integrating a mechanism for distributing tokens (Airdrop) based on the fulfillment of program conditions.
10	**Receiving Airdrop**	Developing a procedure for users to receive tokens as part of a referral program and by meeting established conditions.

11	**Team Statistics**	Implementing a system for calculating and displaying team metrics, allowing users to track their performance and the success of the team.
12	**Referral Tree Data**	Development of functionality to display the structure of a user's referral network and track the performance of invited participants.
13	**Team Turnover Bonus**	Development of functionality to display the structure of a user's referral network and track the results of invited participants.
14	**Transaction History**	Development of functionality to display a user's activity history in the application (deposit addition, reward withdrawal, airdrop claim, etc.).
15	**Weekly Bonus Details**	Development of functionality to display salary data, track progress toward meeting the conditions for receiving the salary for the current week, and view the payout history for previous weeks.
16	**Progress Signals**	Implementation of a mechanism that tracks key system events (such as Airdrop distribution, allocation option reward accrual, etc.) and automatically notifies users about them.
17	**In-App Progress Notifications**	Implementation of an automatic notification system that informs users about significant events (such as Airdrop distribution, allocation option rewards, etc.) directly within the app.
18	**Internal Community Development Analytics**	Development of a system for collecting and analyzing user activity within the application: tracking actions, engagement, behavior funnels, and feature effectiveness to support data-driven product decisions.

19 Weekly Report in Telegram Bot

Implementation of automatic weekly report delivery via Telegram bot with a concise summary of key metrics. The report will display information on credited and withdrawn Airdrop amounts, deposit rewards — including the amount withdrawn and the portion transferred to vesting — as well as data on the weekly team bonus: both credited and withdrawn amounts. Additionally, the report will include insights on team growth, such as the increase in total team turnover and the number of new referrals.

20 Key Metrics Monitoring Dashboard

Building an internal interactive dashboard to monitor business metrics and user activity. The dashboard enables tracking the dynamics of key metrics, evaluating product feature performance, and identifying growth opportunities.

21 Token Smart Contracts

Design, development, testing, and deployment of the smart contract that manages the issuance, distribution, and core rules of the BTN token within the ecosystem.

22 Smart Contracts Integration

Integration of the BTN token smart contract with the backend system and user interface, enabling token transfers, balance display, and interaction with the token within the application.

23 Reinvest BTN Function

Implementation of functionality that allows users to reinvest their accumulated BTN rewards directly into a new deposit. This feature enables instant compounding by automatically creating a new deposit at the user's standard rate without the need to withdraw tokens to an external wallet.

Pre-seed

Seed

Building the foundation and preparing for the token listing:

• **User ID Automation —** each user gets a unique digital identity.

• **Smart Contract Deployment —** core logic of the platform goes live.

• **Pool Monitoring —** tracks pool activity and calculates user rewards.

• **«Play to Earn» Preparation —** developing quests and tasks with BTN rewards.

• **BTN Distribution Begins —** early users start receiving their tokens before listing.
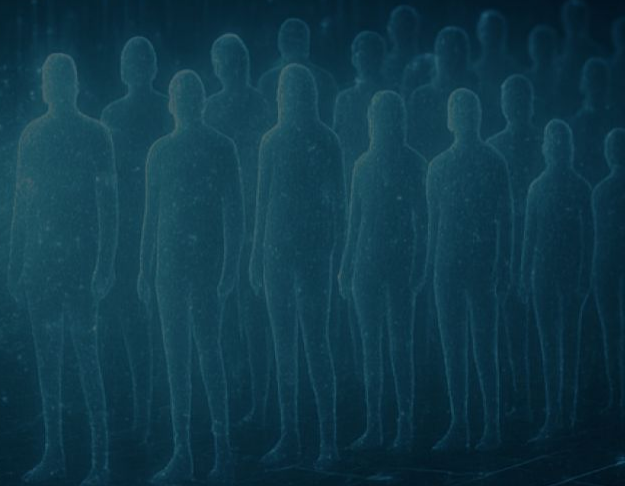

BitTON.AI

Foundation

Turning BitTON.AI into a full ecosystem:

• **Own Blockchain Launch —** BitTON.AI moves to its own blockchain.

• **iOS/Android Apps —** access your account directly from your phone.

• **Validator Interface —** users can participate in maintaining the network and earn rewards.

• **Play to Earn Expansion —** full rollout of game-based earning features.

• **Liquidity Pools —** token trading and staking available inside and outside the platform.

BitTON.AI

Expansion

Scaling up and adding real-world utility:

• **PoD (Proof of Decentralization) —** project growth based on real user activity.

• **Green Energy Integration —** part of the network will run on clean, renewable energy.

• **RWA (Real World Assets) Support —** link BTN with assets outside the blockchain.

• **Validator Tools & Ranking —** improve performance tracking and transparency.

BTN Token

Why the BTN Token Price Will Grow

The rise in BTN's value is a fundamental part of its economic model. The project uses a logarithmic price growth model tied to the number of tokens issued:

• **Starting price: $1.00**

• **When 5 million tokens are issued: $7.59**

• **When 10 million tokens are issued: $57.65**

• **At the maximum supply of 21 million tokens: $3,324.50**

The earlier you acquire the token — the higher your potential profit in the future.

What Drives This Growth:

BTN is not distributed instantly. Its issuance depends on real user activity and the fulfillment of specific conditions.

➤ Rewards are given only to those who truly participate in the ecosystem — hold deposits, actively use the platform, invite referrals, etc.

➤ This prevents hyperinflation and ensures a sustainable economy.

2. Limited Supply

No more than 21 million BTN will ever be issued — this is a fixed amount. As demand increases and supply remains limited, the price naturally rises.

3. AI and Smart Contract Management

All token issuance and distribution is done automatically, without manual intervention, ensuring transparency and fairness.

4. Availability on Exchanges

After the official listing on August 24, 2025, BTN will be available on major decentralized exchanges (Uniswap, PancakeSwap, STON.fi, etc.), which will ensure high liquidity and global access.

5. Real DeFi-Based Yield

BTN is backed by real sources of income — concentrated liquidity, farming, trading activity — all of which strengthen its intrinsic value and demand.

The price of BTN will grow as the ecosystem develops, the user base expands, and key roadmap stages are achieved. This is programmed in smart contracts and powered by AI — you are investing in a sustainable and transparent model.

Staking Offer

Minimum deposit and withdrawal **1 TON.**

User Payments:
All deposits are made in TON tokens.

Rewards & Paybacks:
Users receive staking rewards in BitTON.AI tokens which can then be converted to TON, if you wish so.

Withdrawals on deposits: every Tuesday.
Referral earnings: every day.

Withdrawal Terms (Allocation Option Conditions)

BitTON.AI provides users with a structured staking and deposit program, ensuring predictable rewards over a 135-day period:

For a user who wants to activate a new option, the amount must be at least 1 TON, regardless of the previous option size.

70%

Rewards in BitTON.AI tokens are converted at the current exchange rate into TON tokens and sent to the user's wallet.

BitTON.AI

Direct Bonus

• Invite your Active Direct Members people you personally refer who are active.

• Build your team and earn Direct Bonuses from the 1st up to the 10th line.

• With every deposit made by your referrals, you receive rewards ranging from 0.5% to 10%, depending on the level.

• Direct Bonus is credited in TON tokens and can be withdrawn at any time.

level

*PV = Personal Volume

To move up in the ranking system, you need to:

1. Invite active direct members — people you personally referred who are active.

2. Build an active team — have active users in your structure, up to 15 levels deep.

3. Sometimes meet a personal activity requirement (PV) — this could be your own deposit or purchase.

Matching Bonus System: How It Works

• **Accrued only on new deposits (from August 15).**

• **Withdrawals are processed only on the Rewards withdrawal day.**

• **Minimum withdrawal amount — equivalent of 1 TON in BTN.**

• **Rewards are credited in BTN tokens.**

• **Withdrawals — in BTN/TON.**

Matching Bonus applies to all staking from August 15.
No withdrawal fee for BTN from the Matching Bonus,
just like there is no fee for withdrawing rewards in BTN.

BitTON.AI

Promo «Match & Up!»

Climb the ranks, build your first-line turnover,
and claim incredible rewards!

**The promotion runs from
August 17 to October 31!**

Check the conditions carefully and grab your prize:

Promotion Rewards by Rank

1. Gold Promotion
Condition:
• Reach Gold Rank
• Generate Ⓑ 5,000 of 1st line turnover

Reward Options:
• AirPods (or equivalent headphones)
• $500 deposit
• $250 in TON

2. Platinum Promotion
Condition:
 • Reach next Rank (Platinum)
 • Generate Ⓑ 15,000 of 1st line turnover

Reward Options:
 • iPhone (or equivalent smartphone)
 • $1,000 deposit
 • $500 in TON

3. Sapphire Promotion
Condition:
 • Reach next Rank (Sapphire)
 • Generate Ⓑ 35,000 of 1st line turnover

Reward Options:
 • MacBook Air (or equivalent laptop)
 • $2,000 deposit
 • $1,000 in TON

4. Ruby Promotion
Condition:
 • Reach next Rank (Ruby)
 • Generate Ⓑ 50,000 of 1st line turnover

Reward Options:
 • MacBook Pro (or equivalent device)
 • $3,000 deposit
 • $1,500 in TON

5. Emerald Promotion
Condition:
 • Reach next Rank (Emerald)
 • Generate Ⓑ 75,000 of 1st line turnover

Reward Options:
 • Luxury Cruise (Deluxe room for 2)
 • $5,000 deposit
 • $2,500 in TON

BitTON.AI

The Future Starts Now

Transparent algorithmic rewards.
Daily rewards with the option to convert to TON, predictable income, payouts every Tuesday.

Smart tokenomics and ecosystem growth. Dynamic liquidity expansion strategy, token share on deposit, long-term value creation.

Flexible partner program.
Bonuses for team turnover, income from deep-level structures, unlimited and instant withdrawals.

Next-gen AI-driven blockchain
Hybrid PoD consensus model, emission tied to ecosystem growth, clean energy support, secure and scalable infrastructure.
